Project Title: [loan eligiblity verification and emi payment tracking system]

Course: Java Programming Lab / Mini Project

Student Name & Roll No: [Deva G & 25BCS212]

Department: Computer Science

Mentor / Guide: [Name & Designation]

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

INTRODUCTION

Overview of the Loan Management System and its purpose

This project automates loan eligibility checking, EMI calculation, and repayment tracking

It reduces manual errors and improves efficiency in financial operations

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

OBJECTIVE

Main goals of the project:

- To design and implement a Java-based loan system
- To automate loan eligibility checking
- To calculate EMI accurately
- To track loan repayment status
- To demonstrate object-oriented programming concepts

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

PROBLEM STATEMENT

Manual loan systems have several issues such as:

- Calculation errors
- Time-consuming processes
- Poor EMI tracking

This project solves these problems by providing an automated loan management system

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

SYSTEM REQUIREMENTS

Hardware Requirements:

- Processor: Intel i3 or higher
- RAM: 4 GB minimum
- Storage: 500 MB free space

Software Requirements:

- OS: Windows / Linux
- Java JDK
- IDE: Eclipse / IntelliJ / VS Code

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

SYSTEM DESIGN

Structure and workflow of the system

Include diagrams such as:

- Flowchart (loan processing flow)
- Algorithm outline
- Block diagram (Customer, Loan, EMI Tracker modules)

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

MODULE DESCRIPTION

Input Module – Takes customer and loan details

Processing Module – Performs eligibility check and EMI calculation

Output Module – Displays loan approval and EMI details

Tracking Module – Tracks EMI payments and repayment status

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

ALGORITHM / FLOWCHART

1.Start

2.Enter customer details

3.Enter loan details

4.Check eligibility

5.If eligible → calculate EMI

6.Display EMI

7.Track EMI payments

8.Stop

(Insert flowchart image here)

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

IMPLEMENTATION

Techniques used:

- Java Classes and Objects
- Conditional statements (if-else)
- Loops (while loop)
- Methods and modular design

Include a code snippet (EMI calculation or eligibility check)

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

OUTPUT SCREENS

- Input screen sample (user enters details)
- Loan approval/rejection output
- EMI calculation display
- EMI tracking status

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

RESULTS & DISCUSSION

System successfully calculates EMI

- Provides accurate loan eligibility results
- Tracks EMI payments effectively
- Improves efficiency and reduces manual errors

TECHNICAL TEAM

C PROGRAMMING PROJECT PRESENTATION

CONCLUSION & FUTURE ENHANCEMENT

Conclusion:

- Project successfully automates loan management
- Demonstrates Java programming concepts

Future Enhancements:

- Add GUI (Swing/JavaFX)
- Integrate database
- Enable online payment system

TECHNICAL TEAM
